

Marcopolo G8 | Taking you to the future.

Paradiso G8 1800

Taking you to the future.

Body aims to serve long itineraries, for line services and tourism. The Paradiso 1800 is a body that allows the use of 6x2 and 8x2 chassis. The Paradiso 1800 has the largest passenger transport capacity in the Paradiso family, combined with a good luggage capacity. It has ample customization capacity for use in different applications.

Excellence for the driver

Increased rear-view mirror visibility.

Driver survival cell. (Optional)

More space in the cabin.

Remodeling of the driver's station, providing greater visibility to the driver.

Translucent area on the door allows obstacles on the side of the vehicle to be seen.

Possibility of adding a refrigerator on the driver's side, making it more practical for the driver.

Excellence for the passenger

Decorative lighting on the roof of the lower floor and side of the overhead luggage rack.

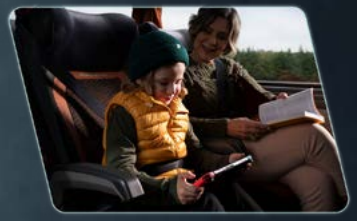

Overhead luggage rack with more space available for luggage.

Air renewal system on both floors.

Privileged view of the landscape.

Modeled and simulated structure for programmed deformation, providing more safety to occupants.

Seats with new piston system, with smooth reclining and easy access and maintenance

Overhead luggage rack: decorative lighting on the side and more space available for luggage.

Larger and brighter restroom with UV-C disinfection systems.

Curved windows, reducing vibration in the passenger area.
